perf sentinel

September 2026

"Q3 & "review""

41

For one action in the application, the application fetched information 41 times instead of once.

Fix confirmed by measurement

Seen on 20 August 2026. Not detected since 28 August 2026.

Measured on prod-eu, production, 30 days

perf-sentinel.dev/verifier

perf sentinel

September 2026

Every unnecessary operation costs server time, energy and sometimes waiting.

Measuring them shows where the application can do the same work with less.

Measured on prod-eu, production, 30 days

perf-sentinel.dev/verifier

perf sentinel

September 2026

In July 2026, before the fix:

1.9 million

unnecessary operations, at least 12 kg CO2e (estimate)

Equal to at least 5 average meals in France

1 average meal in France = 2.04 kg CO2e. Source: ADEME, Base Carbone, V23.6 (2025-07-03)

Measured on prod-eu, production, 30 days
